Problem: 1. Reenlistment Statistics (R044B) does not include History data (ARCHIVE.DBF).

NOTE: Send PN1 Lockhart a copy of the fixed version for testing.

Bug # Description

2. My statistic reports don't match my actual reenlistment monthly statistics.

Solution: 1. Include history data when creating an R044a, R044b report.
2. Change the algorithm to use the RE codes for eligible/non-eligible status. The reports requires that the members have the following fields coded accurately:

- EAOS, Active Duty Obligation Expiration Date.
- REUPDATE, Reenlistment date, if any.
- Reup Code, 1-Eligible, 2-4 Ineligible for reenlistment
- END_ACTION, Final disposition D=discharge, E=Extended, F=Fleet Reserves, R=Reenlist
- TERM, 1-st Term, 2-nd Term, C-Careerist

A. To be included in the report the members must have an EAOS or Reup date during the reporting period. For example for December 1999 Retention Statistics Report, the reporting period would be 12/01/1999 to 12/31/1999. All members whose EAOS or Reup date occurred between these dates will be included in the report. The resulting members will be placed into one of the following categories: (1) eligible and reenlisted, (2) eligible and not reenlisted or (3) not eligible for reenlistment.

B. Not-Eligible members. Members whose Reup Code = 2-4 are categorized as not eligible for reenlistment. (Ref: OPNAVINST 1160.5C Section 6. Reenlistment Eligibility Classifications dated 18 Oct 1993.

C. Eligible members and not reenlisted. Members whose Reup Code = 1 (or 0, default) and Final disposition is other than Reenlist. (NOT END_ACTION = R).

D. Eligible members and reenlisted. Members whose Reup Code =1 (or 0, default) and Final Disposition is reenlist (END_ACTION = R) and reup'd during the period, (BEGIN <= REUPDATE AND REUPDATE <= END).

E. TERM, SEX, ETHNICITY are used to further subdivide the group into other categories.

NOTE: Include in release Version 1.0c.

3. The file maintenance function has been changed to automatically update the Archived members's UIC/DEPT/DIV based on the current OFFICE table settings and to remove duplicate Archive member found in the CIPM file.

4. Changed the CIPM Member browse screen to reflect the statistic input fields .

Version:	VER 1.0A	Verified:	/ /	Release:	Rel.1.0d
		Rejected:	/ /	Tester:	Unassigned

Problem: SRB (SERVICE REENLISTMENT BONUS) Worksheet does not take into account Zone C members.

Zone C is a member with 10-14 years of service and reenlists for 5-years. This would take him to 18 years. The Navy will only pay up to the 16 year mark and the next 2 years the service member would not be entitled to an SRB. When the worksheet calculates the SRB it figures beyond the 16 year point.

Solution: (See Attachment).

6. 00007 PC EDVR Import Calculates The EAOS/Separation Date Incorrect

Type:	Bug	Reported:	08/11/99	Fixer:	JOHN CARTER
Priority:	Low	Est close:	11/09/99	Pgms:	PKEDVR

Phone:	792-2963	Received:	06/09/00	Release:	1.0d
Version:	VER 1.0C	Verified:	06/09/00	Release:	Rel.1.0d
		Rejected:	/ /	Tester:	JOHN CARTER

Problem: Inoperative extension (InOpExt in months) is not applied to the member's EAOS automatically when the InOpExt becomes Operative. The member's current EAOS expires. Then the new EAOS is calculated by adding the InOpExt months to the expired EAOS.

For example, if the member's EAOS = {2001.04.15} and the InOpExt =30-mos. Then on {2001.04.16} his new EAOS becomes {2003.10.15}.

Solution: 1. During the PC EDVR Import, calculate the USN members' separation date by adding his Inoperative extension months to his EAOS date. For USNR, use the EREN date for the member's separation date.

2. NC1 O'Connell, NAS Signolli. During the Rebuild all Indexes function, calculate the USN member's separation date using the USN calculations above. For USNR ignore the recalculations.

3. During the Add of or Update of an USN member record update the members separation date with the above calculation. For USNR ignore the recalculations.

ACOSTA	1989.10.28	<10yrs of service	2nd Term
ADAMS	1909.10.26	10yrs or more	Careerist

Bug # Description

2. NC1 O'Connell DSN 314-624-5439 Sigonella, Sicily: EAOS Should be updated with (Term Elg Date - 1day) whenever the Reupdate (REUPDTE) is changed update the Reup Yr plus Ext Mos and Final Action fields.
3. NC1(SW) Bobby Harris NAVCOMTELSTA Far East, DSN 315-243-5402: Drop the Rate change when updating from PC EDVR.
2. PN1 Lockhart: (942-7528) Do not add new members to CIPM if the members is a Projected Lost in the EDVR data. However, if the members exists in CIPM go ahead and update his CIPM record with EDVR data.
3. PN1 Lockhart: Add new CIPM member from the EDVR data, if they don't exist in CIPM master file or ARCHIVE file.
4. PO Hart 449-2269. Change the ADDMEM page layouts:
 - (1) Interview Page: a.) Move TIR Elg, Term Elg(=), TIR and DOR fields to a new page (Advancements), b.) Combine Next Assgmt/Order fields, c) Move Reason for to bottom of page and rename the label to "Reason for Ext", c) Add EAOS and Separation date where the Term Elg(=) field was, d) Rename the Ext Mos(+) field to "In Op Ext Mos", e) Separation date = Reupdate + ReupYr + InOpExt, f) EAOS date = Reupdate + ReupYR -1 day (if EAOS > today) or Reupdate + ReupYr + InOpExt - 1 day (if EAOS <= today) and zero the InOpExt, g) Allow InOpExt to be 0 and 48 months.

Solution: 1. Although the PC EDVR data does not contain a TERM field, we can infer TERM value using the members ADSD field, as
 1st termmer, if member has been in less than 6-years, i.e. ADSD+6YRS>TODAY
 2nd termmer, if member has been in less than 10-years, i.e. ADSD+10YRS>TODAY
 Careerist, if member has been in more than 10-years, i.e. ADSD+10YRS>TODAY.
 Updated TERM field for all members in the Rebuild All Index Files function.

4. Change the ADDMEM page layouts (1) Retention Page to:
 - a.) Move TIR Elg, Term Elg (=), TIR and DOR fields to a new page (Advancements),
 - b.) Combine Next Assgmt/Order fields,
 - c) Move Reason for to bottom of page and rename the label to "Reason for Ext",
 - d) Add EAOS and Separation date where the Term Elg (=) field was,
 - e) Rename the Ext Mos (+) field to "In Op Ext Mos",
 - f) Separation date = Reupdate + ReupYr + InOpExt,
 - g) EAOS date = Reupdate + ReupYR -1 day (if EAOS > today) or Reupdate + ReupYr + InOpExt - 1 day (if EAOS <= today),
 - h) Allow InOpExt to be 0 and 48 months.

2. Chris Anderson, Naples, Italy: The PRD Outlook should display the fields from the CIPM records called ORDERS and REMARKS. This way the report shows the CO who is under orders. The remarks could annotate if someone has an OTEIP extension in or has applied on JASS.

3. Chris Anderson, Naples, Italy: Drop the INTENTION field, since it is not necessary on the PRD Outlook report but leave it on the EAOS Outlook report.

Version:	VER 1.0C	Verified:	06/26/00	Release:	Rel.1.0d
		Rejected:	05/25/00	Tester:	JOHN CARTER

Problem: 1. If you enter (ASVAB) numbers in one of the two version templates but find it was the wrong one, you cannot delete the numbers and enter them in the other one without the data getting all screwed up.

2. P.O. Singleton, VX1, 757-1335, SCORES.SCR: UIC, Dept, Div fields don't match the drop down list Office selection.

3. Chief Stuart. 8/14/00. Change the new format to match the attached NAVPERS 1070/603 Enlisted Classification Record.

Solution: 1. With this release the CREO/REGA/ASVAB Worksheet screens were redesigned to meet the newer formats. The two sets of ASVAB Scores were linked together by common elements. When one ASVAB Score is changed the corresponding Score in the other set is also changed.

2. The UIC, Dept Div fields were fixed to reflect the member's correct office.

Problem: The Counselor Assignment Page Report needs to be in Department order with the Division counselor for that department directly under it. On the Input Counselor section, if you delete a counselor they still show up on the "Members Who Are Counselors Page". If you edit the counselors to put in the new one for that Dept/Div no change occurs on the "Members Who Are Counselors page". There is also no reason for the "Retention Team Member Section" in this report because they are all retention team members.

Problem: 1. Currently report (R008) provides advancement status and the following fields: NAME, RATE, PAYGRADE, ADSD, TIR, PARS, PROF, MIL REQ, DATE ELIG ADV, RACE, SEX, DIV.

2. For the purposes of determining advancement eligibility the following fields are not required and do not need to be included in the report:

ADSD, RACE, PAYGRADE, TIR DATE, TERM ELIG DATE, PARS, PROF MIL REQ.

3. What is needed is a report that will show: Name, Rate, Paygrade, TIR Date, Term Elig Date, PARS, PROF, Mil Req.

4. Future: Computer the Elig Adv date.

5. Add a report query that input Rating Exam(Sep/Mar) and Year (2002). The Terminal Elig Dates and TIR requirements are standard and could be written into the program as CIPM 3.0.

6. Add a report query that input Member's Rank (E5), TIR date and Rating Exam and Year, e.g. Mar 2000 and list members who have the required TIR to participate in the exam, i.e. who is eligible to participate in the exam and what advancement requirements they are missing.

7. The program has a slot for TERM ELIG but it is grayed out and you are unable to put anything in that block. But Again this is something that the program should be able to calculate and save the CCC time.

Solution: 1. Change R008 to report only the following fields: Name, Rate, Paygrade, TIR Date, Term Elig Date, PARS, PROF, Mil Req.

Problem: 1. The Quick Query of the Non-Completed PDB Reporting Onboard PDB List (R078 General Report) function lists all members whether they have or have not completed the PDB Onboard interview. Also, the other two Quick Queries for PDB (E3 Adv and 6-month) have the same problem.

2. All three reports list should list the members by last name alphabetically within each year/month selected.

3. NC Carter. PDB Profile - add EAOS extension field to the EAOS page and on the report near the EAOS field.

The reports should only list those member who have NOT completed the PDB interview.

Solution: Since the Advance Query for the same reports works correctly, change the Quick Query as the Advance Query's "where" clause.

Changed Quick Query code in rptqry.cmdok.click.

49. 00052 High Year Tenur Problems

		Rejected:	/ /	Tester:	Unassigned

Problem: 1. Currently report (R043) provides all personnel nearing their HYT date according to pay grade. In using CIPM and the Interview TAB, there is a date fields for SEP/RET date. However, you cannot input a date different from the EAOS. The system reverts back to the EAOS upon saving and exiting.

2. I as a CCC have a need for a report that would list not only all personnel coming up on their HYT, but also all personnel that have requested a date to transfer to the FLTRES. This information could be input by the CCC using the field provided under the Interview tab, and then produce the report based on the input. As it stands now there is no place to list a retirement date or any report that keys on that information.

3. The report needs to contain the following information to be helpful: NAME, RATE, SSN, PAYGRADE, ADSD, EAOS/EXT, SEP INTERVIEW DATE, TAP DATE, HYTD, (Separation information contained under the retention tab) PAGE 13 DATE, DD2648, CNO QUESTIONAIRE, DD2586 RCVD DATE.

4. Some other issues in CIPM99 are the tickler dates and ASVAB header are just extra, why not have these incorporated into the CIPM Header? Most CCC use the CIPM header and not the other 2.

Also, there are too many keystrokes required to get into the program. You should be able to double click on the name you choose and enter the record, not have to go to the MORE button. Also, why do you have to go to edit every time to see the information? This is just an extra keystroke that is unnecessary. (fixed see Bug 24). In searching for a name, you should be able to type the name in and have the program search. Currently it only searches for the first letter, i.e. if I was searching for "HENSLEY" then I can only type in "H" and then have to scroll down to "HENSELY". If I try to type the whole name the program skips to each letter as a separate search. Instead you should be able to type the entire name and have the computer scroll down to the name or nearest match.

5. I have enclosed the previous fax I sent to your in October with the information about Advancement and the Report I have in question today.

6. NC1 (SW) Bobby Harris NAVCOMTELSTA Far East, DSN 315-243-5402: Drop the word "Overdue" in the heading and body of R043.

Solution: 1. Change ADDCIPM/Interview tab to save changed Sep/Ret Date on the Inputs/CIPM/More/Edit/Interview page. (See attachment 2).

2/3. Create a new report the list HYT (R045 - HYT Report similar to R043) include all personnel that have requested a date to transfer to the FLTRES. (See attachment 3)

4. Do not change Menu options. Leave Inputs/Tickler and Inputs/ASVAB menu

Bug # Description

item.

5. Key strokes are being reduced for edits. (See fixed see Bug 24). The incremental search feature does perform differently from pc to pc because of the processor speed. You should be able to key the first few letters of a last name and the program should position the cursor on the closest match. (We may add a search text box in a future release to all the browse screens.)

Problem: Importing Members from other CIPM 99 system may not assign the members to their original offices, e.g. if an importing member was in UIC=00204/Dept=Security, then he may be placed in another UIC/Dept in the receiving CIPM 99 database. Explanation: all EXPORTED data is assumed to be imported into another similar CIPM 99 office configuration. If so, then the system will be imported correctly.

Solution: 1. The solution is (1) to change the Import file structure to add the UIC/DEPT/DIV fields to the EXPORT file structure (NEWCIPM.DBF) and (2) to change the import function to compare the incoming UIC/DEPT/DIV fields with the receiving OFFICES table and if they match use the receiving office id's for the new incoming members and if they don't match create a new OFFICES entries with new OFFICE ID's for the incoming members using the incoming UIC/DEPT/DIV field contents. For the new office records, fill the Description field with the UIC DEPT DIV contents.
